Office Action Summary

Art Unit: 1745

1. Claims 9-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The terms "high vapor partial pressure" and "low vapor partial pressure", in claims 9 and 17, are of indefinite scope. There is no clear antecedent for "the vapor component" in claim 10. In claims 13 and 21, the terms "constant-remaining increase" and "the constant-remaining vapor depletion" are confusing because if a value remains constant, it must neither increase nor decrease. In claims 10 and 18, the term "substance system selected" does not precisely define the substances. The use of brackets [] in the claims is confusing, because these are normally used to indicated material which is deleted from a claim. What a "quasi electrostatic potential difference" is, in claims 14 and 22, is not understood. The term "several volts", in claims 14 and 22, would have indefinite scope. In claims 15, 16, 23 and 24, the recitation "the bottom" is incomplete. The bottom of what component is intended? The claims are also not in normal process form, where the verbs should be in the active form ("...ing").

2. The disclosure is objected to because of the following informalities: The numerals 2, on page 2/6, line 16; and 21, on page 2/9, line 16, are not found in the drawings. Numeral 28.1, in figure 2, is not found in the specification. Appropriate correction is required. This office action replaces the action of 3/4/99, and is directed to the claims added in the preliminary amendment.
